PROFESSIONAL SUMMARY

Passionate and driven Software Engineering student with a solid foundation in full-stack web development, specializing in creating seamless user experiences across web and mobile platforms. Skilled in WordPress, HTML, CSS, JavaScript, PHP, and React, I am eager to leverage my technical skills in a hands-on internship. Motivated to learn and contribute, I am ready to bring innovative solutions and add value to forward-thinking development teams working on impactful projects.

TECHNICAL SKILLS

Front-End: WordPress, HTML, CSS,

Bootstrap, React

Design Tool: Figma, Canva

PROFESSIONAL EXPERIENCE

Daxium Systems & Solutions

Web Development Intern

2025 May-December

Developed and maintained websites using WordPress, React.js and Tailwind CSS.

Designed and edited graphic content for websites and digital platforms.

Created and edited promotional and informational videos to support marketing activities. Assisted in improving website functionality, UI, and overall user experience.

PROJECTS

E-Commerce website : <https://dilsh.lk/>

2025

Daxium Systems & Solutions for Dilsh Fashion

Developed a fully functional eCommerce website for Dilsh Fashion using WordPress, including product management, shopping cart, and user-friendly design.

Eco Touch – Car Wash Service Website : <https://ecotouch.lk/>
Daxium Systems & Solutions for Eco Touch
Designed and developed a responsive car wash service website using React.js, focusing on modern UI, smooth navigation, and service presentation.

2025

EUE Consultancy – Official Website : <https://www.eueconsultancy.com/>
Daxium Systems & Solutions for EUE Consultancy
Developed a professional and responsive consultancy website using React.js, showcasing services, company information, and userfocused design.

2025

Dad Travels – Travel Agency Website : <https://www.dadtravels.lk/>
Developed a responsive travel agency website for Dad Travels using WordPress, showcasing tour packages, services, and destination information with a user friendly design.

Solo Project

Kangara Holdings – Corporate Website : <https://kangaraholdings.com/>
Developed a responsive WordPress corporate website for Kangara Holdings, focusing on performance optimization, SEO, and seamless UI/UX across all devices

Eco-Center
Group Project
Developed a responsive React-based web platform focused on enhancing user accessibility and experience. The system features real-time inventory updates to streamline stock management, reduce waste, and improve operational efficiency. Integrated GPS tracking allows for optimized logistics and delivery routes, while secure online payment functionality ensures smooth and reliable transactions at economic centers.

NDT(IT)
2024

Online Food Ordering Website
Designed and developed a responsive, user-friendly web interface using HTML, CSS, and JavaScript, backed by a secure PHP and MySQL system for managing user and order data. The platform includes user authentication, order tracking, and full CRUD functionalities for seamless menu and account management.

NDT(IT)
Solo Project
